ECU

1 Supported models and years

This tutorial explains how to connect Bimota bikes to AiM devices. Supported models and years are:

- Bimota DB9 from 2011 onwards

2 Wiring connection

Bimota DB9 features a serial communication bus. To reach it you find a 4 pins Superseal female connector installed on the bike harness. Here below is the connector on the left and its pinout, front view, on the right. Bottom is connection table.

Superseal connector pin	Pin function	AiM cable
2	RS232RX	RS232TX
3	RS232TX	RS232RX
4	GND	GND

AiM device configuration

Before connecting the ECU to AiM device set this up using AiM Race Studio software. The parameters to select in the device configuration are:

- ECU manufacturer "Walbro"
- ECU Model:"Bimota_DB9"

4
